

# Custom actions scheduled job

Scheduled jobs can invoke on existing commands from inside of ERP code.

To fix this there is a command, that receives a parameter called "`callClass`", that can call any Action or Task in ERP.

← Testing jobs

— Basic Information

NAME Testing jobs	SLUG testing_jobs
ENABLED <input checked="" type="checkbox"/> YES	NOTIFY ON FAIL <input type="checkbox"/> NO
COMMAND scheduled-job:run-action callClass=App\Containers\ExternalApplication\Actions\BusinessCentral\SyncExpenseEventsFromBcAction	
CRON INTERVAL everyMinute	CRON TIME Enter cron time if needed (e.i. 23:00 or 05:00)
DESCRIPTION test	
LAST JOB SUCCESS <input type="checkbox"/> NO	

Sample command code:

```
scheduled-job:run-action  
callClass=App\Containers\ExternalApplication\Actions\BusinessCentral\SyncExpenseEventsFromBcAction
```

It also takes an additional argument, that can be passed to it if want/needed: `additionalArgument`
