

# Delete print signer

This action requires the "**delete print signer**" permission.

Print signers, who are **no longer active**, should **never be deleted**, as they are still used when generating signed documents, created in the past (during the time when they were active signers).

Inactive print signers should **never** be deleted.

Only signers, whose "**active from**" date is set in the future, should be deleted, if necessary, since they have not been active yet.
