

Safety standards

- [Overview](#)
- [Create new safety standard](#)
- [Update safety standard](#)
- [Delete safety standard](#)

Overview

Safety standards are used to set which work equipment is required/available for a certain work position.

Safety standards

Example: Work position **construction worker** would need work equipment **Hardhat, safety vest...**

Create new safety standard

This action requires the "**create safety standard**" permission.

A new safety standard can be created through the "**Create safety standard**" form.

The screenshot shows a web interface for adding a new safety standard. At the top, there is a breadcrumb 'Home /' and a title 'Add new safety standard'. Below this is a 'Basic information' section with four fields: 'NAME' (containing 'SAF_ST_1'), 'DESCRIPTION' (containing 'Safety standard 1'), 'WORK EQUIPMENT' (a dropdown menu with 'Select work equipment'), and 'WORK POSITION' (a multi-select dropdown containing 'CNC operator I - Izmena1', 'Višji razvojni inženir za programsko opremo - BS', and 'CNC operator I'). At the bottom right, there is a checkbox 'After save, create another' and a 'Save' button.

When creating a new safety standard, at least the safety standard's name is needed. All other information can be entered later.

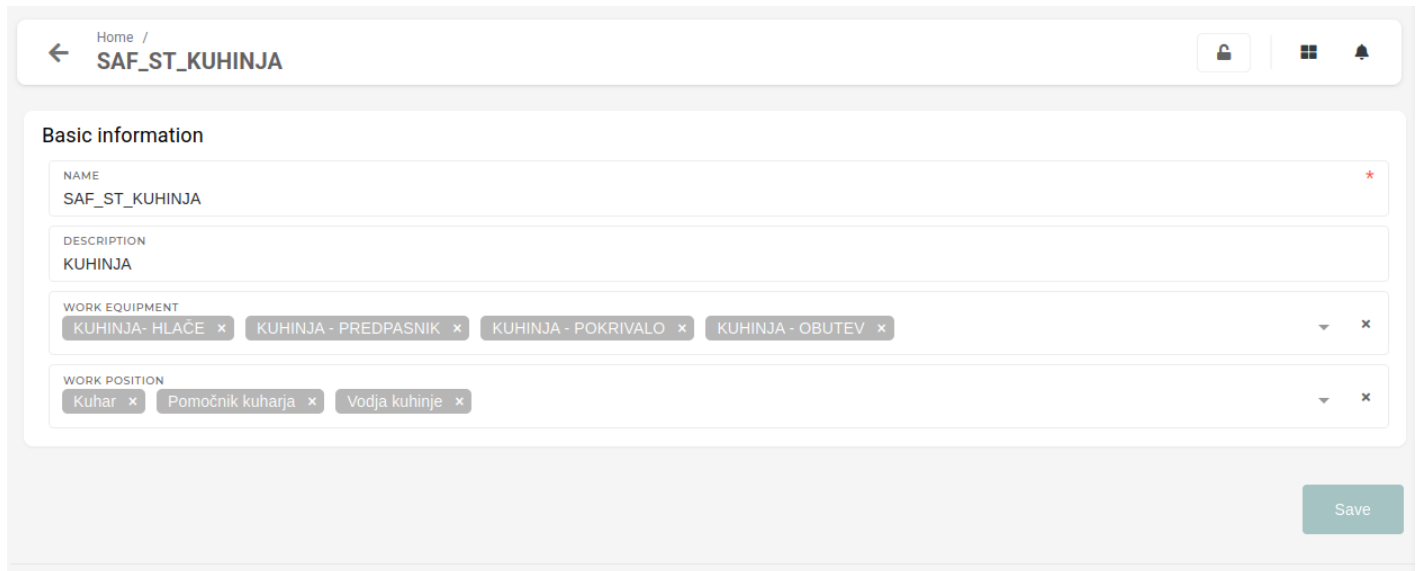

Safety standards do not have a naming convention, the **SAF_ST_** prefix is merely a suggestion.

When creating a new safety standard, you can define, for which work positions it applies.

Example: The **Kitchen** safety standard would apply work positions **chef, cook, dish washer...**

Update safety standard

This action requires the "**update safety standard**" permission.

The screenshot shows a web application interface for updating a safety standard. At the top, there is a breadcrumb navigation bar with a back arrow, the text 'Home /', and the identifier 'SAF_ST_KUHINJA'. To the right of the breadcrumb are three icons: a lock, a grid, and a bell. Below the breadcrumb is a section titled 'Basic information'. This section contains four input fields: 'NAME' with the value 'SAF_ST_KUHINJA' and a red asterisk indicating it is required; 'DESCRIPTION' with the value 'KUHINJA'; 'WORK EQUIPMENT' which is a multi-select field containing four items: 'KUHINJA - HLACE', 'KUHINJA - PREDPASNIK', 'KUHINJA - POKRIVALO', and 'KUHINJA - OBUTEV'; and 'WORK POSITION' which is a multi-select field containing three items: 'Kuhar', 'Pomočnik kuharja', and 'Vodja kuhinje'. At the bottom right of the form is a green 'Save' button.

Home / SAF_ST_KUHINJA

Basic information

NAME
SAF_ST_KUHINJA *

DESCRIPTION
KUHINJA

WORK EQUIPMENT
KUHINJA - HLACE x KUHINJA - PREDPASNIK x KUHINJA - POKRIVALO x KUHINJA - OBUTEV x

WORK POSITION
Kuhar x Pomočnik kuharja x Vodja kuhinje x

Save

Through the update form, you can manage:

- **Name** and **description** of the Safety standard
- **Work equipment**, that is part of the safety standard
- **Work positions**, to which it applies

Both work positions and work equipment can also be connected to the safety standard from their own update forms.

Delete safety standard

This action requires the **"delete safety standard"** permission.

Safety standards can be deleted by toggling their checkbox when viewing in table.

You **can** only **delete safety standards** that do **not have any work equipment or work positions** assigned.
