Create new safety standard

This action requires the "**create safety standard**" permission.

A new safety standard can be created through the "[Create safety standard](#)" form.

The screenshot shows a web application interface for creating a new safety standard. The page title is "Add new safety standard" with a back arrow and a home icon. The form is titled "Basic information" and contains the following fields:

- NAME:** SAF_ST_1 (marked with a red asterisk, indicating it is required).
- DESCRIPTION:** Safety standard 1
- WORK EQUIPMENT:** Select work equipment (dropdown menu)
- WORK POSITION:** A multi-select dropdown menu with three selected items: "CNC operater I - Izmena1", "Višji razvojni inženir za programsko opremo - BS", and "CNC operater I".

At the bottom right of the form, there is a checkbox labeled "After save, create another" and a green "Save" button.

When creating a new safety standard, at least the safety standard's name is needed. All other information can be entered later.

Safety standards do not have a naming convention, the **SAF_ST_** prefix is merely a suggestion.

When creating a new safety standard, you can define, for which work positions it applies.

Example: The **Kitchen** safety standard would apply work positions **chef, cook, dish washer...**

Update safety standard

This action requires the "**update safety standard**" permission.

The screenshot shows a web interface for updating a safety standard. At the top, there is a breadcrumb 'Home / SAF_ST_KUHINJA' and navigation icons. The main section is titled 'Basic information' and contains four input fields:

- NAME:** SAF_ST_KUHINJA (marked with a red asterisk)
- DESCRIPTION:** KUHINJA
- WORK EQUIPMENT:** A multi-select field containing 'KUHINJA - HLAČE', 'KUHINJA - PREDPASNIK', 'KUHINJA - POKRIVALO', and 'KUHINJA - OBUTEV'.
- WORK POSITION:** A multi-select field containing 'Kuhar', 'Pomočnik kuharja', and 'Vodja kuhinje'.

A 'Save' button is located at the bottom right of the form.

Through the update form, you can manage:

- **Name** and **description** of the Safety standard
- **Work equipment**, that is part of the safety standard
- **Work positions**, to which it applies

Both work positions and work equipment can also be connected to the safety standard from their own update forms.

Delete safety standard

This action requires the "**delete safety standard**" permission.

Safety standards can be deleted by toggling their checkbox when viewing in table.

You **can** only **delete safety standards** that do **not have any work equipment or work positions** assigned.
