

Create new printer

This action requires the **"create printers"** permission.

A new printer can be created by accessing the create form on the [printers](#) table through the **"Create new"** button.

Home /
PRINTERS | Add new printer

Basic information

NAME
Enter name

DESCRIPTION
Enter description

SECRET

☐ After save, create another

Save

To create a new printer, enter a unique **name** for your printer and its **description**. The printer **"secret"** is generated automatically.

It is recommended that the new printer's description should contain information about the printer, to which it corresponds (manufacturer, model, ...) for easier identification in the future.
