

# Create work equipment

This action requires the "**create work equipment**" permission.

New work equipment can be created through the "**Create new work equipment**" form.

The screenshot shows a web application interface for creating work equipment. At the top, there is a breadcrumb navigation bar with a back arrow, the text 'Home / Create work equipment', and icons for a grid and a bell. Below this is a section titled 'Basic information' containing several input fields: 'NAME' (with a red asterisk indicating it is required), 'PRODUCT' (a dropdown menu with 'Select product' as the placeholder), 'FROM' (a date field with a calendar icon), 'TO' (a date field with a calendar icon), 'RESTORE INTERVAL (DAYS)' (a text field with the value '0,00'), and 'SAFETY STANDARDS' (a dropdown menu with 'Select safety standards' as the placeholder). At the bottom right of the form, there is a checkbox labeled 'After save, create another' and a 'Save' button.

When creating a work equipment, at least its name is required.

- **Name:**
  - The name should be descriptive, to avoid confusion with other work equipment.
- **Products:**
  - On or more products, that are used as this work equipment (safety goggles or shoes with different sizes...)
  - Only **products that have define confection size**, will appear here.
- **From:**
  - The date, when this work equipment becomes active (starts being used)
- **To:**
  - The date, when this work equipment becomes obsolete (stops being used)
- **Restore interval (days):**
  - Define the renewal period for employee equipment (they will get new equipment every **X** days).
- **Safety standards:**
  - Select which safety standards include this work equipment.

- One work equipment can be used by multiple safety standards
