

Generate holidays for year

This action requires the "create holiday" permission.

Holidays can be added one at a time through the "Create new" form or they can be generated for the entire year through the "Add holidays for year" form.

To generate holidays for a select year, first we have to **select the year, from which we will copy the holidays**, eg. 2024. We then **select the year that we want to generate the holidays for**, eg. 2025. Once both years are selected, a list of all holidays will appear with dates for the new year generated. You can now uncheck holidays that you don't want to generate.

☐ All dates are correct. Generate

Once you have made sure, that all the (checked) dates are correct, press the "Generate" button. This will create a list of new holidays for the selected year.

New holidays must be added for every year, as they are required for handling vacations within the HR module.
