

# Overview

Tags are used within the ERP to mark entries or to "tag" them as a certain thing for informational purposes.

Tags are used to categorize announcements, mark EOL products, setup product hierarchies, shown in price lists...

| <input type="checkbox"/> | NAME ^               | FULL PATH NAME                 | SLUG                 | TABLE NAME    | TYPE    | PARENT TAG  | ORDER COLUMN | DESCRIPTION          | COMMENTS | ACTIONS |
|--------------------------|----------------------|--------------------------------|----------------------|---------------|---------|-------------|--------------|----------------------|----------|---------|
| <input type="checkbox"/> | Austria              | Global Crew > Filter > Austria | austria              | announcements | default | Filter      | 18           |                      | 0        |         |
