

Update safety standard

This action requires the "**update safety standard**" permission.

The screenshot shows a web application interface for updating a safety standard. At the top, there is a breadcrumb 'Home / SAF_ST_KUHINJA' and a lock icon. Below this is a 'Basic information' section with four fields: 'NAME' (containing 'SAF_ST_KUHINJA'), 'DESCRIPTION' (containing 'KUHINJA'), 'WORK EQUIPMENT' (containing four tags: 'KUHINJA- HLACE', 'KUHINJA - PREDPASNIK', 'KUHINJA - POKRIVALO', and 'KUHINJA - OBUTEV'), and 'WORK POSITION' (containing three tags: 'Kuhar', 'Pomočnik kuharja', and 'Vodja kuhinje'). Each tag has a close button (x). A 'Save' button is located at the bottom right of the form.

Through the update form, you can manage:

- **Name** and **description** of the Safety standard
- **Work equipment**, that is part of the safety standard
- **Work positions**, to which it applies

Both work positions and work equipment can also be connected to the safety standard from their own update forms.
