

Update safety standard

This action requires the "**update safety standard**" permission.

The screenshot shows a web application interface for updating a safety standard. At the top, there is a breadcrumb 'Home / SAF_ST_KUHINJA' and a navigation bar with a lock icon, a grid icon, and a bell icon. Below this is a section titled 'Basic information'. It contains four input fields: 'NAME' with the value 'SAF_ST_KUHINJA' and a red asterisk indicating it is required; 'DESCRIPTION' with the value 'KUHINJA'; 'WORK EQUIPMENT' with a list of tags: 'KUHINJA- HLACE', 'KUHINJA - PREDPASNIK', 'KUHINJA - POKRIVALO', and 'KUHINJA - OBUTEV'; and 'WORK POSITION' with a list of tags: 'Kuhar', 'Pomočnik kuharja', and 'Vodja kuhinje'. Each tag has a small 'x' icon to remove it. At the bottom right of the form is a 'Save' button.

Through the update form, you can manage:

- **Name** and **description** of the Safety standard
- **Work equipment**, that is part of the safety standard
- **Work positions**, to which it applies

Both work positions and work equipment can also be connected to the safety standard from their own update forms.
