☐ DELETE FILES ON 'COPY FROM' ENTRY

Copy files

First, select the source model type from the list of supported.

Then, enter the source (*copy from*) and target (*copy to*) IDs in the "**Map ID to ID**" section.

Map ID to ID (1)

Add new row

1	<div>COPY FILE MANAGER CONTENT FROM ID 2154324</div>	<div>COPY FILE MANAGER CONTENT TO ID 54325432</div>	X
---	--	---	---

☐ DELETE FILES ON 'COPY FROM' ENTRY

Copy files

You can also paste a comma-separated lists into the **"Import from list"** form to import values into the **"Map ID to ID"** section.

Take notice of ID position in the "copy to" and "copy from" lists while importing values form lists. Check all imported data in the mapping section before running the copying function.

Import from list

Import will overwrite existing ID to ID mapping.

MOVE FILE MANAGER CONTENT FROM ID
1,2,3,4,5,6,7,8,9

MOVE FILE MANAGER CONTENT TO ID
2,3,4,5,6,7,8,9,10

Import from list

Clicking on the **"Copy files"** button will copy files from every source entry to the target entry.

If the **"Delete files on source model"** checkbox is ticked when the **"Copy files"** button is clicked, the files on the source entry will be deleted.
