

2026-04-23

- Added "Stock in finishing" tracking to product inventory and parts lists.
- New user profile setting allows you to receive email notifications whenever a task is assigned to you.
- Redesigned the Changelog viewer to organize general, technical, and API updates into separate tabs.
- Improved table management tools to easily link, view, or remove filters associated with scheduled jobs.
- Simplified the conference check-in tool to automatically handle voucher prefixes during manual entry.

Revision #2
