

2026-09-04

Here are the latest updates to the platform:

- **Improved Status Workflows:** The status selection menu has been redesigned to clearly show transition history and specific requirements—such as mandatory comments or confirmations—before a change is applied.
- **Enhanced Sales Personnel Tracking:** Sales personnel profiles now include a dedicated "Address Book" and a "Leads" section, making it easier to manage assigned accounts, departments, and contacts in one place.
- **DocuWare Integration:** You can now send issued invoices directly to DocuWare, with new status indicators showing whether a document has been successfully uploaded.
- **Better Document Management:** The file manager now features checklists for required documents (such as invoices and customs MRNs) and organizes files into specific folders based on their document type.
- **Smarter Search & Product Creation:** Table filters now support wildcards (using `%` for multiple characters or `_` for one), and you can now set prices for multiple local price lists simultaneously when creating a new product.
