

2026-09-22

Here is the changelog for the latest update:

- **French Language Support:** Added full support for the French language, including translated menus, forms, and local date and number formatting.
- **Device License Printing:** You can now print "Device license certificates" directly from the serial number and sales order print menus.
- **Enhanced Task Management:** Added the ability to cancel and reopen tasks, along with a new "Task Approvals" page to manage products requiring confirmation before assembly.
- **Assembly Safety Gates:** The system now automatically blocks assembly for products that are "release candidates" or have incomplete "required modifications," showing clear alerts and guidance to the worker.
- **Live Connection Monitoring:** Added a health indicator that warns you if your real-time connection to the server is lost, ensuring you know when the data on your screen might be out of date.

Here are the updates for this release:

- **Status Management:** Users can now remove a status from documents within workflows that allow it, while maintaining a full record of the change in the status history.
- **German Language Support:** The platform now fully supports the German language, including localized date and number formatting.
- **Quote and Order Enhancements:** Added an "Issue Date" field to quotes and improved the HQ ordering process to clearly show restrictions based on currency and item availability.
- **Account Reorganization:** Added a tool to convert an existing Account into a Department for easier organization under a parent account.
- **Supplier and Document Tracking:** Introduced new fields for supplier-specific product instructions (such as calibration and programming notes) and a new section to view and download external documents linked to sales orders.
