

2026-09-25

Here are the latest updates for Booster ERP:

- **Enhanced Dashboards:** Added new widgets for weather, daily restaurant menus, and employee birthdays, along with new country-based filters for CRM charts and reports.
 - **Redesigned Activity Feed & Notes:** Refreshed the look of the activity timeline and notes for better readability, including the ability to collapse long reply threads and select specific languages for voice dictation.
 - **Expanded Sales & Quote Features:** You can now create Proforma Invoices and choose whether to show or hide individual item prices within grouped sections on quotes and orders.
 - **New User Management Tool:** Added a feature for administrators to quickly copy roles and permissions from one user to multiple others, with options to either add to or replace existing roles.
 - **Improved Communications:** Email templates now support multi-language translations and previews, and you can now include file attachments when creating Freshdesk support tickets.
-
- You can now view and add comments to past status changes directly within the history timeline.
 - Added a Print button to Internal Stock Service records for easier documentation.
 - Added automatic warnings and unit labels to quantity fields to ensure the number of items matches the selected serial numbers.
 - When logging items by SKU (without serial numbers), you can now select a specific Goods Receipt to improve tracking.
 - Product exports now provide clearer feedback, including a notification if a large export has been sent to your email.
