

2026-09-29

Changelog

- **User Management:** Added a "Tenant Access" tool to manage user roles and access levels across different company subsidiaries.
- **Sales Orders:** Separated CRM tags from Sales Order tags to keep customer-related notes and order-specific details distinct.
- **Inventory:** Enhanced goods write-offs to allow users to enter credit note prices and track differences between credit amounts and current stock values.
- **Production Tracking:** Assembly tasks now require users to provide a reason if the actual work time exceeds the planned technology time.
- **DocuWare Integration:** Introduced the ability to upload and resend Purchase Orders directly to DocuWare, including status tracking within the system.

Here are the latest updates for this version:

- **DocuWare Integration:** You can now upload and resend purchase orders directly to DocuWare from the order list and detail pages.
- **Enhanced Sales Order Tags:** CRM tags and sales order tags are now separated on the forms to help keep your data organized.
- **Improved Goods Write-offs:** You can now enter specific credit note prices and view warnings when there is a difference between the credit note amount and the recorded stock value.
- **Advanced Task Time Tracking:** Production tasks now include a countdown timer for planned assembly time and will prompt for a reason if the work takes longer than expected.
- **Centralized Subsidiary Access:** Added a new "Tenant Access" tool that allows administrators to manage and sync user roles across different company subsidiaries from a single screen.
