

2026-10-01

- **Enhanced User Management:** Introduced a new "Tenant Access" tool that allows administrators to manage user roles and permissions across multiple subsidiaries from a single interface.
- **Production Time Tracking:** Added a timer for assembly tasks to track "Technology Time," now requiring users to provide a reason if the planned assembly time is exceeded.
- **DocuWare Integration:** Integrated DocuWare into Purchase Orders, allowing users to upload documents directly to the archive and track their sync status.
- **Improved Tagging:** Separated CRM tags from Sales Order tags on forms to help distinguish between marketing notes and order-specific management.
- **Inventory Adjustments:** Updated the Goods Writeoff process to allow entering specific credit note prices and automatically tracking differences in stock value.
- **Loading Screen:** Improved the startup animation with a smoother color transition when the application opens.
- **Rental Management:** Added the ability to link existing rental licenses directly to items within a sales order.
- **Task Tracking:** Updated the task view to prominently show the "Planned Finish" time; clicking it now displays a countdown of the remaining time.
- **System Labels:** Added "Time remaining" labels and improved time formatting across the application for better clarity.
- Fixed an issue in the Quote Editor to ensure saved data and settings are updated correctly.
