

2026-10-05

- Fixed an issue in the quote editor to ensure data is updated and displayed correctly.

Here are the latest updates for the ERP:

- **Box Selection for Tasks:** Added the ability to scan or select a specific box when recording internal service tasks; this is now required for Level 1 tasks before completion.
- **Clickable Box Numbers:** Box numbers in the "My Tasks" section are now links that take you directly to the detailed serial information page.
- **Improved Checkbox Visibility:** Selected checkboxes now feature colored backgrounds (matching their status like "Success" or "Warning") to make them easier to see.
- **Refreshed Task Header:** Redesigned the information header in the error tracking view to provide a cleaner, more organized layout for service and serial details.
- **Lead Creation Workflow:** Updated the lead creation process to ensure a smoother transition and better file handling after a new lead is saved.

Changelog

- **New Purchase Order Suggestions:** Added a module that automatically suggests products to order based on stock levels, historical use, and upcoming demand.
- **Order Management:** You can now create purchase orders, send inquiries to suppliers, or reject suggestions directly from the new suggestions list.
- **Customizable Ordering Rules:** Added settings to adjust how the system calculates suggestions, including safety stock levels and how far into the future to forecast needs.
- **Quote Shipping Updates:** Improved the quote process to use specific shipping addresses and display full country names for better accuracy.
- **System Settings:** Added a new option to show or hide the internal "box link" in service tasks and error tracking views.
