

2026-10-07

New Features & Improvements

- **Document Linking:** You can now link related documents (such as invoices, delivery notes, and work orders) directly to one another to keep all relevant information in one place.
- **Item Mapping:** When connecting documents, you can now specify which items on the new document correspond to items on the original order, even if quantities are split across multiple shipments.
- **Improved Shipping Visibility:** Packing and shipping lists now clearly display the associated order number for each item, making it easier to track which products belong to which order.
- **Streamlined Quotes for HQ:** Creating an order from a quote is now faster for Headquarters users, with simplified shipment date requirements and fewer manual steps.
- **Profile Settings Update:** The process for choosing your preferred language and date format in your user profile has been updated for better clarity and reliability.

Here are the updates for this version:

- **License Management:** Added new tools to generate and register license files directly within the ERP, and software options are now automatically filtered to show only those relevant to your selected product.
- **AGV Robot Missions:** Introduced an interactive cart placement tool and a "Virtual Cart" view, allowing you to see and select specific slots when assigning items to robot deliveries.
- **Task Sorting:** Improved the "My Tasks" list with faster performance and a new default sorting order based on planner priority.
- **Stock Service Improvements:** Added a summary for faulty goods and enhanced the visual display of faulty serial numbers in internal stock records.
- **Interface Updates:** Added a dedicated "Save" button to the internal stock service forms for easier record-keeping.
