

2026-10-13

Here are the updates for version 1.724.0:

- **Enhanced Internal Services:** Added a new "Rework Status" field, color-coded task groups for better organization, and a new summary window to view linked service tickets directly from the production screen.
- **Improved Email Tracking:** You can now see a history of sent emails, including the recipient's address and the exact time the email was sent, within the document and service sections.
- **Updated Purchase Suggestions:** The Purchase Order Suggestions list now includes "Product Status" and "Ordered Quantity" to help you make better purchasing decisions.
- **Searchable Selection Popups:** Added a search bar and scrolling capabilities to windows where you select multiple linked items, making it easier to find specific entries.
- **Project Clarity Improvements:** Updated project and product tables to display full product names instead of abbreviations and refined which columns are visible by default.

Here are the changes for version 1.725.0:

- **New Production Guide:** Added a detailed guide for "Fill CNC" work orders, explaining how the system automatically plans production based on stock levels and usage.
- **Serial Number Updates:** You can now see the "End Customer" directly on serial number detail pages.
- **Account Inventory Filtering:** The inventory list on Account pages now shows items based on the assigned End Customer rather than the sales partner.
- **Improved Serial Forms:** Updated CRM and serial number views to include and organize end-customer information more clearly.
