

2026-10-14

Here are the latest updates to the platform:

- **Calibration Reports:** Added a new setting to products and product types that allows you to choose whether they are included in merged calibration report downloads.
- **Invoice Autofill Improvements:** Enhanced the invoice "Autofill" tool with a new detailed window that shows exactly which lines were matched and provides specific reasons for any items that were skipped.
- **Service & RMA Tracking:** Added support for custom tags on external service records and improved notifications for high-priority service items.
- **Work Order Fix:** Resolved an issue where "Required Modifications" would sometimes fail to appear or update immediately after scanning a component.
- **Dashboard Display:** Fixed a visual bug that caused an unnecessary horizontal scrollbar to appear on embedded dashboards.
