

2026-10-21

- Updated final check documentation logic to correctly display files associated with specific Bills of Materials (BOM).
- Added a new "Products" section to both Partner and Product Line pages for easier management of associated items.
- Enhanced bank account tables with improved sorting and filtering for bank names, account numbers, and currencies.
- Updated minimum and maximum stock limits to support decimal numbers for more precise inventory tracking.
- Added a "Shipping Country" field to the Shipping List details.
- Introduced a new "Waste Report" export option for Shipping Lists.
- Improved date filtering in tables to better support date ranges and specific timeframes.
- Fixed an issue where warehouse location names were not displaying correctly in the product stock view.

Improvements

- Added dedicated sections to manage products directly within the **Partner** and **Product Line** pages.
- Introduced a new **Waste Report** export option for Shipping Lists.
- Updated minimum and maximum stock settings to support decimal numbers for more precise inventory control.
- Added a **Shipping Country** field to the Shipping List form.
- Improved table functionality with better date range filtering and more reliable sorting for bank account details.

Bug Fixes

- Fixed an issue where **Final Check** documentation would not appear if it was only attached to a Bill of Materials (BOM).
- Corrected a display error in the **Product Stock by Location** view to ensure warehouse location names show correctly.
