Changelog

- **Excel Email Reports:** You can now link your saved table filters to a daily scheduled job to receive an automated Excel report in your email inbox every morning.
- **Team Reporting (Admins):** Administrators can now set up "system filters" to automatically send personalized reports to specific team members (e.g., sending each buyer a unique list of their own open orders).
- **Branded Browser Icons:** The browser tab icon (favicon) now automatically updates to match your specific company or tenant color scheme.
- **Enhanced Sales Forecasting:** Updated the sales forecast tools to better track "order intake" and allow for more accurate comparisons between projected growth and actual results.
- **Visual Interface Refresh:** All forms and data tables have been updated with a more consistent, modernized layout to improve readability across the application.
- **Improved Form Guidance:** Added new "Info" and "Example" tooltips to many data entry fields to provide clearer guidance on what information is required.
- **Search Label Corrections:** Fixed an issue in the English translation where active filters were not always displaying their names correctly in the search summary.

Revision #1
