2026-10-30

Here are the updates for this version:

- **Customer Information Requests:** Added a new feature to the upgrade flow that allows you to request information from customers directly via email.
- **New Task Status:** Introduced a "Gathering Information" status and banner to track upgrade requests while waiting for a customer's response.
- **Task Assignee Management:** You can now view and update assigned users directly within the upgrade task views.
- **External Service Tasks:** Added a "Tasks" section to External Services to manage related actions, such as shipping agreements.
- **Vacation Descriptions:** Added helpful subtitles to vacation categories (Annual, Special, and Transferred) to clarify how each leave type works.
- **Improved Leave Tracking:** Updated the vacation overview to include transferred days when calculating total used annual leave.
- **Chrome Icon Fix:** Resolved an issue where tenant-specific colored icons (favicons) were not displaying correctly in Google Chrome.
- **Navigation Shortcuts:** External service tasks are now linked and accessible directly from the "My Tasks" dashboard.
