2026-11-02

Here are the latest updates to the platform:

- **Dark Mode (Beta):** Introduced a new Dark Mode theme, which can be toggled from the navigation menu.
- **Sales Commissions:** Added a new section to track sales commission rates and view a detailed commission breakdown directly on orders.
- **Opportunity Collaborators:** You can now assign and manage multiple team members as collaborators on a single opportunity.
- **Inventory Integration:** Added an "Inventory" tab to Opportunities, Quotes, and Sales Orders to view related equipment and serial numbers in one place.
- **Duplicate Items:** You can now quickly duplicate one or more items within Quotes and Sales Orders to save time during entry.
- **Flexible Delivery Addresses:** Improved HQ orders by allowing users to quickly select and change delivery addresses from a list of subsidiary locations.
- **Evaluation Lead Automation:** Added a new setting to automatically create a Lead in the CRM whenever an evaluation license is requested.
- **Improved Table Filters:** Updated data tables with a new popover tool for selecting date ranges and number limits more easily.

- Improved dark mode support for the application's general interface.
- Fixed an issue where announcements pasted from Google Docs or Microsoft Word had unreadable text colors in dark mode.
- Announcements now automatically adjust text colors to ensure they are visible against dark backgrounds.
