2026-11-11

- Introduced **Production Groups** and a **Group Overview** page to manage teams and monitor planned work by day or week.
- Added **My Plan** and **Group Plan** tabs to the home screen for easier access to scheduled tasks.
- Sales orders in the CRM now include a dedicated option to **calculate VAT**.
- Task views now display **BOM time** and **item quantities**, providing better context for production requirements.
- You can now **start tasks directly** from the task detail page, rather than returning to the main task list.
- Added a **Restore to BOM** feature to easily put back serial numbers that were removed from a Bill of Materials by mistake.
- The built-in scanner has been upgraded to support **Data Matrix barcodes** alongside standard QR codes.
- Added a **Redo** feature for error tracking entries (levels 2 and 3) to allow for quick corrections of saved mistakes.

New Features & Improvements

- **Production Groups & Overview**: Introduced Production Groups to manage team members and leaders, along with a new "Production Group Overview" page to track planned and completed work by group.
- **Task Planning**: Added "My Plan" and "Group Plan" tabs to the "My Tasks" dashboard to provide better visibility into scheduled work for individuals and teams.
- **CRM Sales VAT**: Added a "Charge VAT" option for CRM sale orders to allow for automatic tax calculation.
- **Correct Error Entries**: Added a "Redo" feature for Level 2 and 3 error tracking, allowing users to correct mistakes (such as wrong serials or decisions) by reloading and resaving the entry.
- **BOM Restoration**: Added a "Restore to BOM" icon in the serial tree, allowing users to easily re-add serial numbers that were previously removed from a Bill of Materials.
- **Expanded Barcode Support**: Enhanced the built-in scanner to support Data Matrix barcodes in addition to standard QR codes.
- **Real-time Collaboration Alerts**: Added live notifications that alert you if another user locks, unlocks, or saves changes to the record you are currently viewing.
- **Enhanced Task Information**: Added "BOM Time" and "Quantity" columns to task lists and improved the "Start" button prompts to make it clearer when a task needs to be initialized.
