

Exports

Most tables in the ERP offer the option to export rows, currently shown in the table, to a formatted excel file.

This is done by clicking the export button with the Excel file icon. During export generating, the button displays a loading animation. Once finished, the exported excel file is automatically downloaded onto your computer. The exported file is always named by the formula **exported-table-name_today's-date-and-time_random-number.xlsx**

 Countries	 2		Q Search...					
<input type="checkbox"/>	SHORT NAME	LONG NAME	CALLING CODE	PART OF EUROPEAN UNION ▼	UNITED NATIONS MEMBER	ACTIONS		
<input type="checkbox"/>	Northern Ireland	Northern Ireland	44	YES	YES			
<input type="checkbox"/>	Slovakia	Slovak Republic	421	YES	YES			
<input type="checkbox"/>	Slovenia	Republic of Slovenia	386	YES	YES			
<input type="checkbox"/>	Sweden	Kingdom of Sweden	46	YES	YES			
<input type="checkbox"/>	Romania	Romania	40	YES	YES			
<input type="checkbox"/>	Portugal	Portuguese Republic	351	YES	YES			
<input type="checkbox"/>	Poland	Republic of Poland	48	YES	YES			

Export is affected by filters that the user has set. If no filters are applied, all rows in the table will be exported, but if any filters are set, only the rows that fit those filters will be exported into excel.

Example: *Export of countries that are members of united nations and the european union.*
