

# Exports

Most tables in the ERP offer the option to export rows, currently shown in the table, to a formatted excel file.

This is done by clicking the export button with the Excel file icon. During export generating, the button displays a loading animation. Once finished, the exported excel file is automatically downloaded onto your computer. The exported file is always named by the formula **exported-table-name\_today's-date-and-time\_random-number.xlsx**

<input type="checkbox"/>	SHORT NAME	LONG NAME	CALLING CODE	PART OF EUROPEAN UNION	UNITED NATIONS MEMBER	ACTIONS
<input type="checkbox"/>	Northern Ireland	Northern Ireland	44	YES	YES	
<input type="checkbox"/>	Slovakia	Slovak Republic	421	YES	YES	
<input type="checkbox"/>	Slovenia	Republic of Slovenia	386	YES	YES	
<input type="checkbox"/>	Sweden	Kingdom of Sweden	46	YES	YES	
<input type="checkbox"/>	Romania	Romania	40	YES	YES	
<input type="checkbox"/>	Portugal	Portuguese Republic	351	YES	YES	
<input type="checkbox"/>	Poland	Republic of Poland	48	YES	YES	

Export is affected by filters that the user has set. If no filters are applied, all rows in the table will be exported, but if any filters are set, only the rows that fit those filters will be exported into excel.

**Example:** *Export of countries that are members of united nations and the european union.*

The screenshot shows the ERP interface with the following configuration:

- Available fields:** A list of fields with checkboxes. 'Calling code' and 'United Nations member' are checked. Other fields include 'Alternative code', 'Created at', 'Created by', 'Currency code', 'Group A-E', 'ID', 'ISO code', 'ISO numeric code', 'Long name', 'Part of European Union', 'Require EUC verification supply', 'Require end customer', 'Short name', 'Show in shop', 'Updated at', 'Updated by', 'lat', and 'lng'.
- Filters:** Two filters are applied: 'UNITED NATIONS MEMBER' and 'PART OF EUROPEAN UNION', both set to 'YES'.
- Save current filter and columns:** A 'Save' button is present.
- Saved filters:** 'No saved filters.' and a 'Reset to default filter' button.

## Special purpose exports

On certain tables, special, formatted exports are available alongside the default export. Here, a list of available exports is shown in a tooltip. These exports are present for a specific purpose and are usually unaffected by set filters or selected visible columns.
