

Global search

The two icons above navigation in menu are used for quicker navigation through the ERP and for globally searching through it's data.

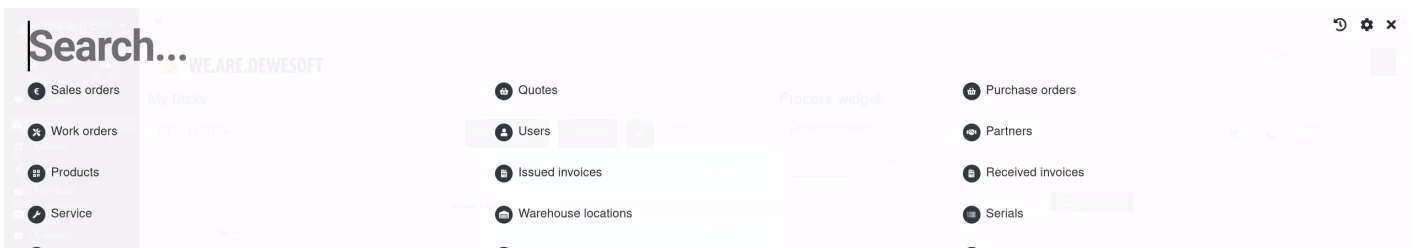

Clicking the magnifying glass button opens up the global search overlay, where you can search for items by document numbers, names, ...

Global search can also be opened by pressing the "**CTRL + S**" shortcut.

Search history

Global search provides a short **search history**, that can help you find your past searches, when you need them.

Past searches are filtered during search to show searches that best match you current search.

You can toggle search history by clicking the "**clock**" icon on the right side of the screen.

Customize your global search

Users can customize their global search by clicking the "**cog**" icon on the right side of the screen.
