

Multiple people editing a form

It often happens that multiple people are editing a single form at once.

You can see who is editing the form in the "presence channel", next to the record's document number.

When one editor saves the form, it is automatically disabled for everyone else and a message is displayed, that the form was saved by someone else. If possible, the page with the form should be refreshed, since it will remain disabled until it is refreshed.

Revision #3
