

Adding authorizations on work position

This action requires " **view roles and update work positions**" permissions.

Work positions can have directly attached authorizations that are assigned to users when their work position is set.

This can be used to **standardize authorizations for all employees with a certain work position** ad once.

These attached authorizations can be managed in the "**Authorization info**" tab on work position's form.

The screenshot shows the 'Basic information' tab of a work position form. The breadcrumb is 'Home / Administrator'. The tabs are 'Basic information', 'Work equipment', and 'Authorization info'. The 'Basic information' tab is active. It contains three input fields: 'WORK POSITION', 'WORK POSITION INTERNATIONAL TITLE', and 'LEAVE BONUS', each with a red asterisk indicating it is required.

To attach "**authorizations**" (roles) to a work positions, search and select it from the list of roles. After the roles list is saved, the users should re-login to use newly attached permissions.

The screenshot shows the 'Authorization info' tab of the work position form. The breadcrumb is 'Home / Administrator'. The tabs are 'Basic information', 'Work equipment', and 'Authorization info'. The 'Authorization info' tab is active. It contains a dropdown menu labeled 'ROLES' with the text 'Select roles' and a downward arrow. A 'Save' button is located at the bottom right. Below the form, there are three notification items: 'File manager' with 0 notifications, 'Comments' with 0 notifications, and 'Activity timeline' with 5 notifications.
