

Adding work equipment for work position

This action requires " **view safety standards, view work equipment and update work positions**" permissions.

Before adding work equipment for a work position, the **work position needs to have safety standard(s) attached**.

Work equipment, that can be added for a work position, is determined by attached safety standards.

The screenshot shows a web application interface for 'Asistent vodje sestave inštrumentov'. The top navigation bar includes a back arrow, the title 'Home / Asistent vodje sestave inštrumentov', and tabs for 'Basic information' and 'Authorization info'. On the right, there are icons for a lock, a grid, and a bell. The main content area has three sections: 'Basic information', 'Hr departments', and 'Work equipment'. The 'Work equipment' section contains a dropdown menu labeled 'SAFETY STANDARDS' with the text 'Select safety standards' and a downward arrow. Below this is a section labeled 'WORK EQUIPMENT' with a '+ Add new' button. A 'Save' button is located at the bottom right of the form. At the very bottom, there is a 'File manager' link with a red icon.

When the safety standards for work position have been set, we can attach work equipment from those safety standards.
