

Create new serials

This actions required the **"create serial"** permissions.

Adding a new serial through the ERP is usually not necessary, as new TBD serials are automatically generated for work orders and can simply be renamed.

Serials can be added via the ERP "[Add new serial number](#)" form.

The screenshot shows the 'Add new serial number' form in an ERP system. The form is organized into several sections:

- Basic information:** Includes fields for SERIAL NUMBER (required), SERIAL NUMBER ALIAS, FIXED ASSET, INVENTORY NUMBER, PRODUCT, PARTNER, PARENT SERIAL, LICENSE, and WAREHOUSE LOCATION.
- Equipment and Care:** Includes toggle switches for DEMO EQUIPMENT, DEMO MALFUNCTION EQUIPMENT, RENTABLE EQUIPMENT, TOTAL CARE, and TO BE DEFINED.
- Calibration and Warranty:** Includes date pickers for SALES DATE, LAST CALIBRATION, and NEXT CALIBRATION; a text field for WARRANTY DUE; a text field for CALIBRATION INTERVAL (MONTHS) set to 0,00; and a toggle for CALIBRATION REQUIRED FOR VALID WARRANTY.
- Other Fields:** Includes CALIBRATION TRAY PREPARED BY, WARRANTY (toggle), WARRANTY YEARS, and PRODUCTION AMOUNT (0,00).
- BOMS:** A dropdown menu for selecting a BOM.

A red bar at the bottom of the form indicates 'Invalid fields'. At the bottom right, there is a checkbox for 'After save, create another' and a 'Save' button.

When adding a new serial number into the system, only its serial number value is required.

When adding a new serial number, keep in mind that the system does not limit the adding of multiple serials with the same serial number. There can, however, not be more than a single serial with a particular serial number and a particular product type.
