

Delete products

This action requires the **"delete products"** permission.

Deleting products is not advisable, as they are referenced in many places in the ERP system, but can be done from the products table.

Only products, created recently (eg. a month ago or within the current year) should be considered for deletion. Old products that are no longer being sold, should be marked as deprecated or obsolete instead.

To delete a product, locate it in the table. Then tick it's checkbox and press the **"Trash"** button. A confirmation dialog will appear, and once confirmed, the product will be deleted.

Products
