

# Delete products

Deleting products is not advisable, as they are referenced in many places in the ERP system.

Only products, created recently (eg. a month ago) should be considered for deletion. Old products that are not sold any longer, should be marked as deprecated instead.

To delete a product, go and find it in the table. Then check it's checkbox and press the "trash" button. A confirmation dialog will appear, and once confirmed, the product will be deleted. You can check and delete multiple rows at once.
