## The SKU

Every product has its own unique SKU, which must remain unchanged, to avoid unintentional duplicates.

Product's SKU should not be updated, if at all avoidable.

## The short name

A product has a full and an abbreviated version of its name. The short version of the name should not be updated, as it version it is written on many documents, including invoices. Short name should remain unchanged to avoid any discrepancies.

Product's short name should not be updated, if issued invoices exist for that product.
