

Create new goods receipt

This action requires the "**update work order**" and "**create goods receipt**" permissions.

New goods receipts are not created with a "create" form. Instead, creation of goods receipts is done from the work order's details page.

To create a goods receipt, open a work order's page and look for a list of work order's items.

The screenshot shows a web interface for a work order. At the top, there is a breadcrumb "Home / DNC-04208-2024" and a toolbar with buttons for "Material flow", "Barcode card", "To single piece", and a lock icon. Below this are two tabs labeled "Work order information". A main section titled "Items" is expanded, showing a table of work order items. The first item is highlighted with a red border and contains the following information: a plus icon, the work order ID "DNC-04208-2024/1", a quantity of "1x", a material code "AME.0600758.10C", a status "0.00 / 0.00 / 0.00 / 1.00", a receipt quantity of "0/1", and due dates "Material due date: Empty" and "Due date: Empty". To the right of this item is a green button labeled "Create goods receipt" with a plus icon, and three smaller icons: an eye, a trash can, and a list icon. Below the table are three more tabs: "Goods receipt", "Data fields" (with a red notification icon), and "File manager" (with a red notification icon). A "Save" button is located in the top right corner of the main content area.

Only items of **production, CNC or development work orders** can be received.

All items that can be received will have a button labeled as "**Create goods receipt**" present on the right side.

 ALU_IOLITE_W_FRONT_STG6 0/2 Create goods receipt

Clicking the button opens a form, where serials have to be entered, if the product's stock is tracked by serials. With the serials added and a warehouse location to receive the stock to, selected, a goods receipt can be created.

If there is no more material/products to receive after the goods receipt is created, the work order will automatically be set as **"Closed"**.

To view the newly created goods receipt, open work order's **"Goods receipts"** section, all goods receipts of this work order will be listed there.
