

Cancel an issued invoice

If invoice has already been issued and sent to customer, you need to issue a new credit note. You should not modify already sent invoices!

1. Open the problematic **issued invoice** and remove all of its **items**.
2. Update the **shipping** and **financing** costs to **zero**.
3. Change status of the **issued invoice** to **canceled**.
4. Change invoice's **delivery note** status to **canceled**.
5. Delete **shipping list**:

DOCUMENT NO.	ORDER #	ORDER #	NUMBER OF PACKAGES	NET WEIGHT	GROSS WEIGHT	CREATED AT
SL-01057-2024	02136-2022	02136-2022	9	131.73	166.6	Mar 15, 2024

6. Delete **packing list** (flow is the same as for deleting shipping list)
7. Go to the **Packing work order** and open it's **material flow**.
8. Find all of the write-off documents:

← 204	GWO-007382-2024	KRYPTONI-16xTH (PIN.2010124.000)
-------	-----------------	----------------------------------

9. Open each write-off and cancel it (this will remove write-off transactions from database):

← GWO-007382-2024
