

Create a new permission

To create a new permission, navigate to the "Add new authorization permission" form by clicking the "+" button in the top right above the table or by visiting the ["Add new permission form"](#) directly.

Add new authorisation permission

Basic information

NAME

Test tasks

SLUG

tasks-test

GROUP

tasks

DESCRIPTION

Allows testing of tasks, used in the ERP

☐ After save, create another

Save

When creating a new permission, a unique name is required, alongside a corresponding permission slug. The slug is how the permission will be called during checks.

temp

☐ document-form-templates

☐ notification-templates

☐ price-templates

☐ template-types

☐ templates

Defining the group that the permission belongs to, is not necessary but is encouraged, as it makes it easier to find the new permission while searching for it.

TIP: Description is not strictly required, but should be added when possible, to describe what the permission is used for.
