USERS

john@doe.com

☐ After save, create another

Save

- **Name**
 - Select a descriptive name for the role (eg. a work position, like **Department Lead**)
- **Slug**
 - Is used to identify the role throughout the ERP. Is usually formatted role name (eg. **department-lead**)

- **Level**

- A role's level is used to determine its priority over other roles. Roles with higher priority overrule roles with lower levels.

- **Description**

- Is not required, but it's highly encouraged that it be added. Used to further explain the role's purpose.

- **Permissions**

- Select, which permissions are attached to this role.

- **Users**

- You can list users, that will have this role here, and it will be assigned to them automatically after role is created.
