

# Update an existing permission

Permissions should be updated only by people, who know their purpose, as permissions are used to grant access to a parts of the ERP .

To edit an existing permission, find it in the permissions table and click on its **"Edit"** button.

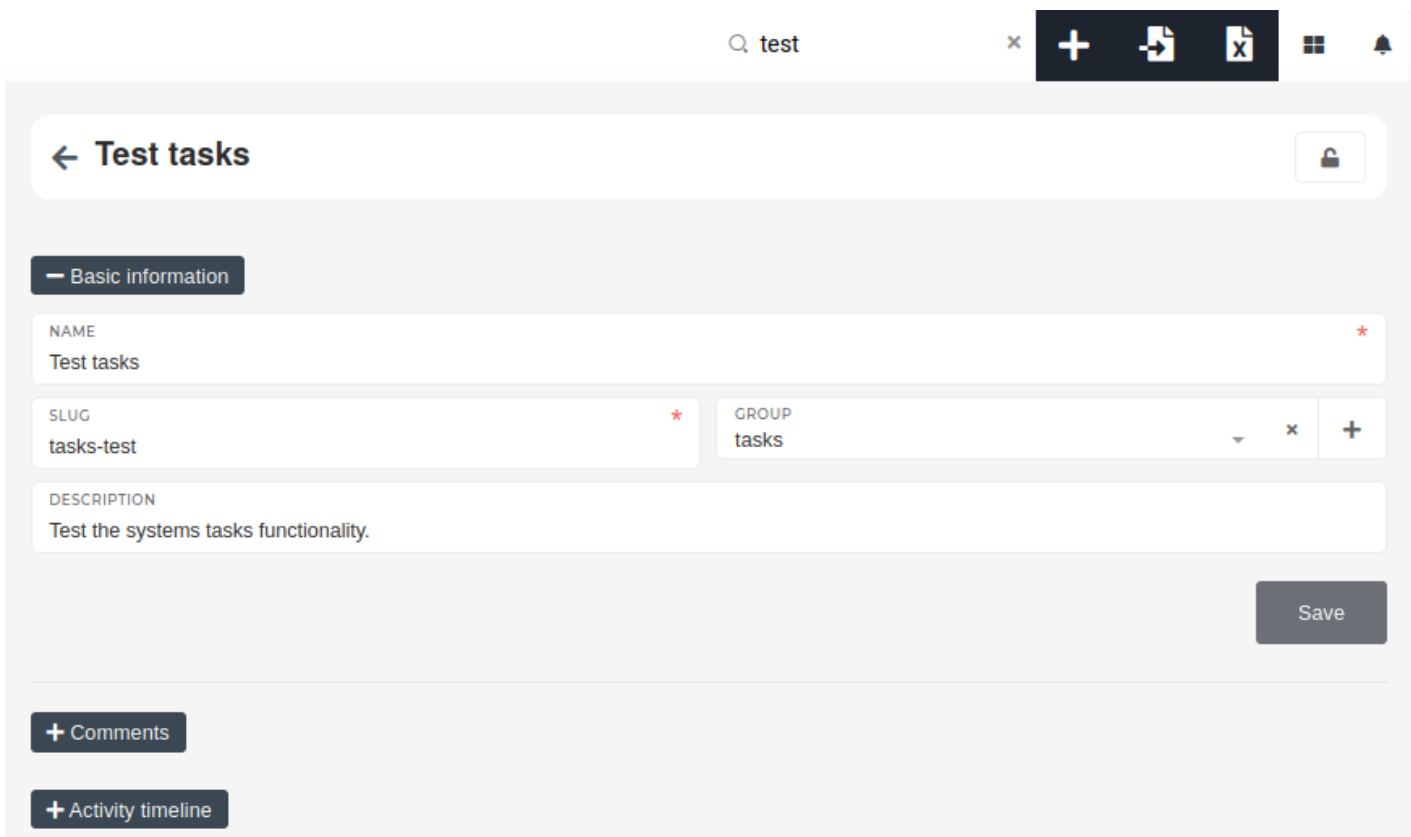

ID	NAME	DESCRIPTION	SLUG	ROLES	GROUP	ACTIONS
6619	Test tasks	Test the systems tasks functionality.	tasks-test			

Showing 1 to 50 of 1 entries | Show 5 10 25 50 100 per page

On the permission's page, you can update its name, description and group, that's used to show grouped permissions in permissions section on user and role page.

It is not recommended to update a permission's slug, as it may be used for programmatic access control.

test

## ← Test tasks
