Warehouse locations

- Overview
- Create new warehouse location
- Update existing warehoues locations
- Delete warehouse locations

Overview

Warehouse locations in the ERP represent locations around the company, from actual warehouses and offices to employee's desks.

> Every employee has their own location, that is used to show that items on that warehouse location are in that employee's possession.

Products (materials, equipment...) can be received to and transferred between these warehouse locations. Warehouse locations are also used to calculate material stock by location.

	NAME	WAREHOUSE ⌃	DEFAULT PRODUCT LINE	CREATED AT	CREATED BY	UPDATED AT	UPDATED BY	ACTIONS
☐	S1/2R1/2/03	1 - Material		Mar 3, 2017		Mar 3, 2017
