

Adding work equipment for work position

This action requires " **view safety standards, view work equipment and update work positions**" permissions.

Before adding work equipment for a work position, the **work position needs to have safety standard(s) attached**.

Work equipment, that can be added for a work position, is determined by attached safety standards.

The screenshot shows the 'Work equipment' configuration page in an Administrator interface. The page has a breadcrumb trail 'Home / Administrator' and navigation tabs for 'Basic Information', 'Work equipment', and 'Authorization Info'. The 'Work equipment' tab is active. The page title is 'Work equipment'. There is a 'SAFETY STANDARDS' section with a dropdown menu showing 'SAF_ST_SHOES'. Below this is a 'WORK EQUIPMENT' section with a table. The table has two columns: 'WORK EQUIPMENT' and 'QUANTITY'. The 'WORK EQUIPMENT' column has a dropdown menu and a red asterisk. The 'QUANTITY' column has a text input field with '1,00' and a red asterisk. There are 'Duplicate' and 'Remove' buttons below the table. A '+ Add new' button is at the bottom left. A 'Save' button is at the bottom right.

WORK EQUIPMENT	QUANTITY
	1,00

When the safety standards for work position have been set, we can attach work equipment from those safety standards.

Home / **Administrator** Basic Information Work equipment Authorization Info [Lock] [Grid] [Bell]

Work equipment

SAFETY STANDARDS
SAF_ST_SHOES x

WORK EQUIPMENT

WORK EQUIPMENT *	QUANTITY *
WORK EQUIPMENT ▼	1,00

[Duplicate] [Remove]

+ Add new

Save

You can set the **quantity for each work equipment** (how many pieces/pairs of work equipment employees will receive).
